To register, you must:

- Be between 18-60 years old
- Be in good overall health
- Fill out a consent form, including information of 2 contacts not living with you

Jason is 29 years old.

He has Acute Myelogenous Leukemia (AML). He was diagnosed in February 2008 and has been undergoing chemotherapy ever since. He needs a bone marrow transplant for his best chance of a full recovery. Register to become a bone marrow donor and save a life!

Message from Janelle Wang, Host of ABC7's The View from the Bay:

Jason is a Superstar! I'm so thankful to have him as a friend and co-worker. Even after being confined to the same hospital room for nearly 2 months, he's still in great spirits and spunkier than ever. He has always maintained a positive attitude and his sense of humor. At work, Jason knows how to do every job on our talk show. I'm convinced he has an encyclopedia in his brain. He's one of the hardest working, smartest, and funniest people I know. Register to become a bone marrow donor. It's so easy! It's just a cheek swab. And if you're a match, you're just donating bone marrow. It's not like your donating an organ or anything. People who have donated before say they would do it again.

Ethnicity is the key factor:

There is a severe shortage of people from diverse backgrounds (Asian and Pacific Islander, Hispanic and Chicano, African American, Native American and Multi-racial individuals). Jason is of Chinese descent and will most likely find a donor of the same background. You could be a match for him or someone else like him.
