Ed is getting a little squishy. He's now "neutral" until he gets to put out more information. Says he's getting bombarded with complaints. Ainbinder is providing information as fast as it can; traffic studies, drainage reports, potential drawings. They should have lots of data in two weeks. Wal Mart is starting to engage the community with their story.

Ed needs a little hand holding from MAP. We need to decide on when and how we are going to announce the 380 agreement. Maybe a Mayor's Report next week on the jist of the two proposals? At least a call from her. He feels like he's carrying the load on this matter. We need to separate the development from wal mart; they are the main concern. Soon, there will be lots of folks coming to public session, and the mayor needs to be ready with good data.

I will meet with you tomorrow at 9:30 and we can talk before or after.

This one says "grocery store"
Shouldn't we go with "Wal-Mart" rather than this, now that it a signed contract?
CM Gonzales is hosting a meeting this afternoon with Ainbinder and Wal-Mart in his offices. I am not now planning on attending, unless I get suggestion otherwise from you.
