Sweepstakes Entry Form

(Please Print, Complete and Mail In)

Parents First Name _____ Parents Last Name _____

Parents City _____ Parents State _____ Parents Zip Code _____

Parents Birth Date _____ Childs First Name _____ Childs Age _____

Childs School Name _____ Childs Grade _____

Multiple choice questions: Circle the letter associated with the correct answer.

How do rainbows form?

- A. When lightning strikes and separates a colorful spectrum is created.
- B. After a rainstorm, moisture breaks up the light spectrum and creates a band of separated colors.
- C. Heat lighting causes rainbows to form.

Why do we get more sunlight in the summer than we do in the winter?

- A. Because the Moon hides behind the sun in the summer.
- B. Because the Earth is tilted on its axis, the sun rises and falls differently in the summer compared to the winter, thus rising earlier and setting later, in turn creating more sunlight in the summer.
- C. Because school is out for the summer.

Why are sunsets red?

- A. Because light is refracted by particles in the atmosphere and the red end of the spectrum is what is visible.
- B. Because the sky is blue.
- C. Because particles mix with the air.

To enter to win properly complete all entry fields above and send Sweepstakes Entry Form to "ABC 7 EYEWITNESS NEWS Weather Sketchers' Whiz Kid Sweepstakes", c/o WLS-TV, P.O. Box 64389, Chicago, Illinois 60664-0389. All entries must be received by June 19th, 2014. Limit one entry per person. For official rules and regulations visit ABC7Chicago.com.
