

Typical Section

Franklin St in Downtown Chapel Hill

Notes:

1. Where on-street parking is permitted, nine feet of street width will be provided (2 feet wider than existing); the additional width is to provide passenger side occupants space to open vehicle doors adjacent to the water-filled barrier.
2. Bike lanes shown in graphic are to be shared with pedestrians.
3. Barriers shown in graphic are to be installed parallel to direction of travel.
4. All fire access points will provide an 8-foot wide gap for Chapel Hill Fire Department; 4 feet on each side of a hydrant.
