A message from GRANVILLE COUNTY SCHOOL DISTRICT

Dear Parents and Families in the South Granville Community:

Granville County Public Schools has received correspondence from SGWASA (South Granville Sewer and Water Association) about recent violations in the drinking water standards for the municipal water supplied to your child's school. The notice we received (also attached to this email) indicates there is no immediate danger to individuals who consume the water. However, as a courtesy, we have decided to provide our students with commercially filtered water located at water coolers throughout these schools. Students and parents may choose to either use these water sources or the regular water fountains located in our schools. We want to make sure everyone has access to the water source of their choice. If you have any questions, please contact your child's school.

The affected schools include:

1. Butner-Stem Elementary School
2. Butner-Stem Middle School
3. Creedmoor Elementary School
4. G. C. Hawley Middle
5. Granville Central High
6. Mount Energy Elementary
7. Tar River Elementary
8. Wilton Elementary
9. Granville Early College
10. South Granville High School
