

Harris County District Attorney' Office full statement

“The Harris County District Attorney’s Office has an aggressive posture regarding all threats made towards our schools, teachers and students. We routinely prosecute charges from school districts all across the county. We have reached out to the Spring Branch superintendent and police chief about some contradictions in what they are reporting to our prosecutors and to your station. At this time, these cases should be considered under investigation, and we will continue to assist the school district in every way we can.”
